

Corse Dynamics Ducati Headlight kit.

This kit is an aftermarket replacement headlight kit for the Ducati Monster and the Ducati Sport Classic series. A clean simple modern headlight with vintage style. This kit includes:

- Headlamp bucket
- Headlamp
- Billet bracket
- Hardware

Installation:

1. Remove the factory headlight and bracket, keeping the wiring harness from the inside of the OEM headlight (to be used later)
2. Mount the included bracket to the factory lower triple using the supplied M6 screws
3. Remove the outer and inner ring from the new headlamp bucket
4. The factory headlamp plug from your original headlight will need to be taken apart to pass the wires through the back of the new bucket.
5. After routing the harness through the hole in the back of the lamp, re-assembly the headlight plug.
6. Use the two supplied Posilock connectors to connect the wires for the running light
7. Connect the harness to the back of the headlamp and re install the lamp in the bucket
8. Re-install the inner and outer headlight bucket rings
9. Plug the headlight into the factory plug and mount the new bucket
10. Adjust the headlight so the light pattern is at the correct distant and tighten the main pivot bolt
