8	
Make a set up of the damper. recommended click position is 10 - 12 from closed.	
NOTE!	
Make sure that all bolts are tightened to the correct torque and that nothing fouls or restricts movement of the steer-	
ing damper when it is being fully compressed or extended.	
9	
Continue your work according to the Owners Manual, section Adjustments.	
▲ WARNING!	
To prevent danger, study and make certain that you fully un-	
derstand the following informa- tion before handling the steer- ing damper. The manufacturer	
cannot be held responsible for damage to property or per-	
sonal injury that may result from improper handling. Take care not to scratch the	
contact surface of the piston rod of the cylinder; oil could	
othervise leak out.	

Notes

Make sure that all bolts are

Mounting Instructions

Mounting instructions Öhlins steering damper kit SD 154 for Ducati Monster S4

Öhlins steering damper R&T

Your Öhlins steering damper R&T features the followinging adjuster:

The adjustment knob has 16 different positions and counts in number of clicks from maximum hard position.

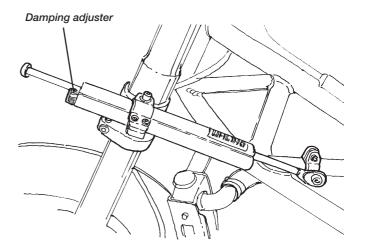

NOTE!

When delivered the Öhlins steering damper is dialed to recommended setting for the specific brand and make of the motorcycle. If you have changed the settings follow the instruction below:

The adjusters have a normal right hand thread. Turn clockwise to fully closed (pos. zero [0]). Turn counter clockwise to open and count the clicks until you reach the recommended number of clicks. See Setup data at last page.

CAUTION!

Do not use too much force, delicate sealing surfaces can be damaged. Use fingers only.
