Focus

Combining exceptional ergonomics with unparalleled technical content has always been a priority for Dainese. Super Speed Tex sets the new standard for summer jackets, designed specifically for sports riding and with excellent technical content: composite protectors, aluminium inserts on the shoulders, various adjusters and chest and back protector pockets, zip for fastening to the trousers, are just some of the features of this assertive looking jacket. Made of mesh fabric, Super Speed offers excellent ventilation, with a removable windproof insert that ensures correct regulation even with changing weather conditions.
